THE TERRITORIAL PAPERS OF THE UNITED STATES

Compiled and edited by
Clarence Edwin Carter & John Porter Bloom

"This series consists of the texts, literally reproduced, of the official records of some 30 states of the Union during their territorial periods, arranged in the order of creation of the Territories." (*—Publications of the Department of State, Oct. 1, 1929–Jan. 1, 1953, p.140*)

Over the course of more than four decades, through the administrations of seven U. S. presidents, a critical national treasure was reclaimed from the depths of government archives in a series of 28 books that document the expansion of the United States from 1787 to 1845. The first book in the series was published in 1934 during the administration of President Franklin Delano Roosevelt, and the last, in 1975 during the Ford administration. This remarkable series ***comprises thousands of pages of documents*** relevant to the creation of states to the west and south of the original colonies, including Mississippi, Indiana, Florida, and Wisconsin.

Each book is packed with intriguing papers relating to the government in that particular territory, such as a listing of its territorial officials and chronological data. The books were published in the sequential order of the territories, one by one. The first volume provides an overview to the series, along with the Preface and Introduction. Some volumes were published in quick succession, while others were separated by a number of years. The first territories were the pioneers; succeeding territories inherited not only the experience of its predecessors, but also the changing policies of the national governments. Some territories were covered in one book; Florida's papers are contained in five. States were created after being territories for about 20 years.

Publication of the *Territorial Papers* was prompted largely by ***lobbying from the nation's historians***, who recognized their significance. The government finally gave in to a public outcry following the 1911 publication of David W. Parker's *Calendar of Papers in Washington Archives Relating to the Territories of the United States (to 1873)*. In his Introduction to the Series, Clarence Edwin Carter noted the *Calendar's* role as a catalyst to their publication: "...this situation reinforced the already urgent pleas for reproducing in permanent form the more important sources now available." Amazing for its scope and magnitude of historic documents gathered from the files of the National Archives and other U.S. government departments, the series chronicles the metamorphosis of western frontier tracts of land to territories destined to become states in the Union. **Is your U.
