

A Handy **Must-Have** Guide for Law Students and Lawyers!!

What They Don't Teach You in Law School

By Schuyler M. Moore

Law school is filled with rules: rules about statutes, rules about regulations, rules about case law. After a while, law school can become a memorization game, more concerned with teaching concrete imperatives than discussing the deeper nuances of being a lawyer. So how should a lawyer measure success? What do clients want and how far should a lawyer go when pursuing clients' causes? Are there any fundamental principles that can be followed for interpreting the law?

Schuyler Moore's work seeks to answer these and other questions that are often ignored in law school. It sets out to establish what is really important for lawyers so that they may have a solid foundation upon which to build their careers. *What They Don't Teach You in Law School* reviews sources of the law, the attorney-client conflict, financial matters, reasons to be a lawyer, and other issues that delve into what it means to practice law. The result is a concise, practical manual for any law student or lawyer looking to find focus for their career.
