The Regulatory Environment of Chinese Taxation

Second Edition

By Chaowu Jin

The tax system in China is not one of the most advanced in the world, but is certainly one of the most rapidly changing systems. Although keeping up with the ever-changing tax system is not always easy to do, the book will provide readers with up-to-date information about Chinese tax from the perspective of a Chinese tax scholar.

The origin of China's tax law can be dated back to the slavery era more than 2,000 years ago; however, China's tax system was not established until 1950. The system was first reformed in 1953, and then again in 1958, 1973, 1979, and 1994 successively.

Since the first edition of this book was published in 2006, the primary types of tax have undergone substantial changes. Amendments to the Individual Income Tax Law obligated, for the first time, people with an annual income of RMB 120,000 yuan or more to file an annual tax return in addition to having their employer withhold taxes from their pay. With the frequent revisions of a pretax deduction, the individual income

tax became a hot topic in the news. All three of the "backbone taxes" were amended in 2008. The business tax, value added tax, and consumption tax are the primary sources of China's tax revenue.

Highlights changes made to the primary types of taxes in China.

This work also focuses on changes made to taxes of lesser significance, including the farmland occupation tax and the urban land use tax. The animal slaughter tax and the agricultural tax were repealed, while new tobacco and

gas taxes were introduced.

Jin's *Regulatory Environment of Chinese Taxation, Second Edition* provides insight into the system of Chinese taxation. This work includes a brief introduction to the evolution and development of the Chinese taxation system and describes the different types of taxes, the categories they fall into, and the structure of Chinese tax law. This second edition is a key component to any Chinese law collection and a great resource for Chinese legal research.

CHINESE LAW ON SARS

By Chenglin Liu

Adjunct Prof. of Law/Foreign and Intl. Law Librarian University of Houston Law Center/O'Quinn Law Library

During a 2003 outbreak of Severe Acute Respiratory Syndrome (SARS), nearly 8,100 people were infected, 774 of whom died. In all, the cost of combating SARS in China was enormous - the direct economic loss of the outbreak was roughly \$18 billion, while the loss of confidence by the public in the Chinese health care system was immeasurable.

Chenglin Liu's *Chinese Law on SARS* examines the political and legal aspects of the Chinese government's reaction to the SARS epidemic. It analyzes the contrasting responses of the government both before and after April 20, 2003, when the national campaign against SARS was officially launched and the government enacted laws that would play a crucial role in containing the epidemic.

Liu includes all of the major legislation on SARS and other infectious diseases, translating them from Chinese into English. By utilizing the primary materials and analyses in this book, legal scholars and public health experts can make contributions to establishing an effective surveillance system and medical network to prevent epidemic disease both in China and throughout the world.

Hu's *Research Guide* is an essential starting point for all researchers studying China's Patent Law. Hu provides a thorough overview of the Patent System, current laws and regulations, administrative and judicial decisions, international treaties and agreements, patent agents, specific legal experts, statistics, and other publications, organizations and resources to be consulted.

THE AMENDED CRIMINAL PROCEDURE LAW AND THE CRIMINAL COURT RULES OF THE PEOPLE'S REPUBLIC OF CHINA: With English Translation and Introduction

By Wei Luo, , J.D., M.L.S.

Director of Technical Services and Lecturer in Law, Washington University School of Law

Since its enactment in March 1996, China's amended Criminal Procedure Law has generated heated debate among Western observers. Some have hailed it as a milestone on China's path toward the rule of law. They claim that the law's enhanced procedural protections for defendants represent nothing less than landmark reforms of the Chinese legal system.

China's implementation of this law has become a yardstick in the West by which to measure China's treatment of dissidents, its commitment to keeping its "promises" to Hong Kong and its meeting of the obligations it assumed under the International Covenant on Civil and Political Rights.
