**The ONE-STOP sourcebook for important documents and information about the WTO!**

## **WTO LAW, LITIGATION AND POLICY** **Sourcebook of Internet Material**

**Stuart S. Malawer, J.D., Ph. D.**

**Distinguished Professor of Law & International Trade at George Mason University**  
**Visiting Professor at St. Peter's College, Oxford University**

This outstanding sourcebook of hard-to-find Internet documents concerning WTO law, related policies and the dispute resolution system, is a **tremendous resource**. It is long overdue and will be **invaluable to legal researchers, governments and professionals** worldwide.

The World Trade Organization (WTO) is the only global international organization dealing with the rules of trade between nations. It is an open, rules-based multilateral trading system with a new dispute settling process intended to reduce unilateral measures, depoliticize trade disputes, clarify rules of trade, increase trade access and further liberalize trade.

This book provides access to many of the essential pieces of legal and policy information from the WTO, the United States and other major players, such as the EU, China, Japan, Korea and Brazil. Its reliance on material available on the Internet provides evidence of the growth of the historical revolution in information and communications technology that coincides with the birth and growth of the WTO itself. With economic integration increasing rapidly worldwide and more global players entering the scene, the WTO and its dispute resolution system only continue to grow in importance.
