New HeinOnline Database: Water Rights & Resources

A comprehensive collection available for an affordable, one-time payment.

September 2022. HeinOnline, a product of William S. Hein & Co., Inc., is pleased to announce the release of its newest database, [Water Rights & Resources](#), at a time when access to clean, quality water is becoming increasingly difficult for many Americans. This highly editorialized and affordable collection is dedicated to helping users understand the complex interplay of state and federal laws governing water. It includes nearly 3,000 titles, more than 600,000 pages, and 16 brand-new subjects, including **Dams and Hydropower, Drinking Water, Drought and Water Scarcity, Flood and Flood Control, Water Supply**, and more.

This database will be offered to all institutions and organizations for a one-time purchase of \$495.00. For more information, visit <https://home.heinonline.org/content/water-rights-and-resources/>.

About the Database

For those of us who take for granted the ready availability of water flowing from our taps, the concept of water rights may seem strange or confusing. Water rights refers to the right of a user to access water from a particular source. It is one facet of the complex network of water laws that address a multitude of facets over water at both the state and federal level. In the United States, water law focuses on both water use and protection.

HeinOnline's **Water Rights & Resources** is an **affordable, comprehensive, and timely** collection that is dedicated to understanding the complex interplay of state and federal laws that govern all aspects of water in society, from municipal use to restoring its pristine condition. Collecting congressional documents, books, legislative histories on major legislation, and Supreme Court briefs on related cases, this database touches on a wide range of water issues, including irrigation, hydropower, riparian rights, water conservation, drinking water quality, and tribal water rights, encompassing the unique water rights issues that span from the Eastern seaboard to the Great Lakes and across the arid West. In the

face of so much uncertainty, water rights and how to use our water resources becomes even more vital to understand.

This database is:

- Highly editorialized
- An access point for most-relevant and -cited articles
- A timely resource
- 100% subject-coded
- Inclusive of hundreds of related books
- Incredibly affordable
- Updated regularly
- A home for thousands of relevant government documents
- Available for a one-time payment—no subscription required

About HeinOnline

HeinOnline is a premier online research database that provides comprehensive coverage from inception of more than 3,000 multidisciplinary periodicals, essential government documents, international treaties and trials, case law, and much more. Composed of image-based PDFs and available at an affordable price, the wealth of material allows academic institutions, government agencies, law firms, court systems, corporations, and other organizations access to authoritative, true-to-print digital material without the hassle or cost of using multiple research databases. Furthermore, subscriptions to HeinOnline consistently increase in value without added cost as HeinOnline adds daily, weekly, and monthly content while continuously incorporating new artificial intelligence tools for easier research. More information about HeinOnline is available here: home.heinonline.org.
